

## Calfrac Announces 2020 Capital Program

January 14, 2020 5:00 PM EST

CALGARY, Jan. 14, 2020 /CNW/ - **Calfrac Well Services Ltd. ("Calfrac" or the "Company") (TSX-CFW)** is announcing its 2020 capital program of approximately \$100.5 million, which consists primarily of maintenance capital expenditures.

Lindsay Link, Calfrac's President and Chief Operating Officer, commented, "We have proactively decided to market fewer fleets in 2020, which will mean a modest reduction in our planned operations overall. Calfrac's budget represents a prudent response to market conditions, and will allow the Company to continue to deliver safe and efficient service to our clients, while maintaining our focus on free cash flow for the year. We have stated a number of times that returns in the pressure pumping business are below the level needed to sustain the industry in the longer-run, and are well below a level that would incentivize the purchase of new equipment. Our team continues to do an outstanding job of operating and maintaining our fleet and this budget provides the resources for that result to continue."

Calfrac's common shares are publicly traded on the Toronto Stock Exchange under the trading symbol "CFW". Calfrac provides specialized oilfield services to exploration and production companies designed to increase the production of hydrocarbons from wells drilled throughout western Canada, the United States, Argentina and Russia.

This press release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "may", "will", "project", "should", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this press release contains forward-looking statements and information relating to future capital expenditures.

These forward-looking statements and information are based on certain key expectations and assumptions made by Calfrac in light of its experience and perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances, including, but not limited to, the following: the economic and political environment in which Calfrac operates; Calfrac's expectations for its customers' capital budgets and geographical areas of focus; the effect unconventional oil and gas projects have had on supply and demand fundamentals for oil and natural gas; Calfrac's existing contracts and the status of current negotiations with key customers and suppliers; the effectiveness of cost reduction measures instituted by Calfrac; and the likelihood that the current tax and regulatory regime will remain substantially unchanged.

Although Calfrac believes that the expectations and assumptions on which such forward looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information as Calfrac cannot give any assurance that they will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, risks associated with: global economic conditions; the level of exploration, development and production for oil and natural gas in Canada, the United States, Argentina and Russia; the demand for fracturing and other stimulation services during drilling and completion of oil and natural gas wells; volatility in market prices for oil and natural gas and the effect of this volatility on the demand for oilfield services generally; excess oilfield equipment levels; regional competition; the availability of capital on satisfactory terms; restrictions resulting from compliance with debt covenants and risk of acceleration of indebtedness; direct and indirect exposure to volatile credit markets, including credit rating risk; sourcing, pricing and availability of raw materials, component parts, equipment, suppliers, facilities and skilled personnel; currency exchange rate risk; risks associated with foreign operations; operating restrictions and compliance costs associated with legislative and regulatory initiatives relating to hydraulic fracturing and the protection of workers and the environment; changes in legislation and the regulatory environment; dependence on, and concentration of, major customers; liabilities and risks, including environmental liabilities and risks, inherent in oil and natural gas operations; uncertainties in weather and temperature affecting the duration of the service periods and the activities that can be completed; liabilities and risks associated with prior operations; liabilities relating to legal and/or administrative proceedings; failure to maintain Calfrac's safety standards and record; failure to realize anticipated benefits of acquisitions and dispositions; the ability to integrate technological advances and match advances from competitors; intellectual property risks; third party credit risk; and the effect of accounting pronouncements issued periodically. The forward-looking statements and information contained in this press release are made as of the date hereof and Calfrac does not undertake any obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.
