NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

As at and for the three and nine months ended September 30, 2024 and 2023

(Amounts in text and tables are in thousands of Canadian dollars, except share data and certain other exceptions as indicated)

1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Calfrac Well Services Ltd. (the "Company") was formed through the amalgamation of Calfrac Well Services Ltd. (predecessor company was originally incorporated on June 28, 1999 and amalgamated with Denison Energy Inc. on March 24, 2004) and Dominion Land Projects Ltd. on January 1, 2011 under the Business Corporations Act (Alberta). The Company was continued under the Canada Business Corporations Act on December 17, 2020. The Company's principal place of business is at Suite 500, 407 – 8th Avenue S.W., Calgary, Alberta, Canada, T2P 1E5. The Company provides specialized oilfield services, including hydraulic fracturing, coiled tubing, cementing and other well completion services to the oil and natural gas industries in North America and Argentina.

These condensed interim consolidated financial statements were prepared in accordance with International Financial Reporting Standards (IFRS) Accounting Standards applicable to the preparation of the interim consolidated financial statements, under International Accounting Standard (IAS) 34 *Interim Financial Reporting* (together IFRS). They should be read in conjunction with the annual financial statements for the year ended December 31, 2023. Unless otherwise noted, the Company has consistently applied the same accounting policies throughout all periods presented, as if these policies were always in effect.

These financial statements were approved for issuance by the Board of Directors on November 5, 2024.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Except as noted below, these condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual financial statements.

(a) Income Taxes

For purposes of calculating income taxes during interim periods, the Company utilizes estimated annualized income tax rates. Current income tax expense is only recognized when taxable income is such that current income tax becomes payable.

(b) Derivatives and Hedging Activities

i) Derivatives that do not Qualify for Hedge Accounting

Derivatives are only used for economic hedging purposes and not as speculative investments. Where derivatives do not meet the hedge accounting criteria, they are classified as 'held for trading' for accounting purposes and are accounted for at fair value through profit or loss.

The full fair value of hedging derivatives is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months. It is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

See note 8 for further information about the derivatives used by the Company.

3. ASSETS HELD FOR SALE

During the first quarter of 2022, management committed to a plan to sell its Russian division. The associated assets and liabilities were consequently presented as held for sale in the Company's financial statements, effective March 31, 2022, in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

In addition to monitoring and addressing, as applicable, the evolving laws and sanctions from the governments of Canada, the U.S., and other western nations, the Company's efforts to divest of its Russian operations have been impacted by domestic laws and sanctions of the Russian Federation, including without limitation, that any sale or any other transfer or alienation of its Russian subsidiary must be approved by the President of the Russian Federation pursuant to applicable decrees and rules setting out the requirements for exits of foreign investors from Russia (which are updated on a periodic basis). Within this dynamic context, the Company remains committed to the sale of its Russian subsidiary and is seeking to complete this transaction as soon as possible while complying with all applicable laws and sanctions.

In conjunction with the ongoing sale process and in light of the Canadian sanctions and restrictions that were issued in relation to the Russian oil and gas industry and the foreign investor exit rules of the Russian Federation, the Company has adjusted the Russian division's current and long-term assets to reflect their revised expected recoverable amount as at September 30, 2024. Subsequent to the quarter, the Russian government announced additional amendments to the rules applicable to exits of foreign investors from Russia that could result in a further write-down in the net asset value of the Company's discontinued operations. Management will continue to revisit the fair value of the net assets at each reporting period and upon the close of the transaction.

It is management's judgement, that based on the facts and circumstances, the Company continues to control and therefore consolidate the Russian subsidiary.

The Company is not expecting to repatriate any material cash amounts from Russia other than through any proceeds received through the sale of its Russian business.

No deferred tax asset is recognized for the assets held for sale/discontinued operations.

The cumulative foreign exchange gains recognized in other comprehensive income in relation to the discontinued operations as at September 30, 2024 was $7,716 (December 31, 2023 – $7,555).

4. LONG-TERM DEBT

	September 30, 2024	December 31, 2023
(C$000s)	*($)*	*($)*
$250,000 extendible revolving term loan facility due the earlier of: (a) July 1, 2026 or (b) six months prior to the maturity of the Company's Second Lien Notes, secured by the Canadian and U.S. assets of the Company on a first priority basis	**190,000**	95,000
US$120,000 Second Lien Notes due March 15, 2026, bearing interest at 10.875% payable semi-annually, secured by the Canadian and U.S. assets of the Company on a second priority basis	**161,988**	158,712
Less: unamortized debt issuance costs	**(2,024)**	(2,935)
	349,964	250,777

The carrying value of the revolving term loan facility approximates its fair value as the interest rate is not significantly different from current interest rates for similar loans. The fair value of the Second Lien Notes (as defined below), as measured based on the quoted market price at September 30, 2024 was $162,291 (December 31, 2023 – $143,963).

Debt issuance costs related to the Company's long-term debt are amortized over their respective term.

Interest on long-term debt (including the amortization of debt issuance costs and debt discount) for the nine months ended September 30, 2024 was $25,073 (nine months ended September 30, 2023 – $24,568).

(a) Revolving Credit Facility

On June 25, 2024, the Company amended and restated its revolving credit facility agreement in anticipation of the benchmark rate reforms that occurred on June 28, 2024. The Canadian Dollar Offered Rate (CDOR) ceased publication on June 28, 2024 and was replaced by the Canadian Overnight Repo Rate Average (CORRA). In addition, the amendments included a change to the Company's Bank EBITDA definition for financial covenant calculation purposes. The revised definition of Bank EBITDA restricts EBITDA derived from its Argentina operations to a maximum of 25 percent of total EBITDA from continuing operations. The amendments also included the additional requirement that the Company maintain a minimum of $750,000 of net tangible assets in North America or, as previously applied, have 75 percent of its net tangible assets from continuing operations located in North America.

The credit agreement can be extended by one or more years at the Company's request and lenders' acceptance. The Company may also prepay principal without penalty. The interest rates are based on the parameters of certain bank covenants. For prime-based loans and U.S. base-rate loans, the rate ranges from prime or U.S. base rate plus 1.25 percent to prime plus 3.00 percent. For SOFR-based loans and CORRA-based loans, the margin thereon ranges from 2.25 percent to 4.00 percent above the respective base rates.

The Company was in compliance with its financial covenants associated with its credit facilities at September 30, 2024.

(b) Second Lien Notes

The Company issued US$120,000 of new 10.875% second lien secured notes ("Second Lien Notes") due March 15, 2026. The Second Lien Notes may be redeemed, in whole or in part, at redemption prices (expressed as a percentage of principal amount) at any time on or after March 15, 2024 at 100.000%, plus accrued and unpaid interest, if any, to, but not including the redemption date.

The following table sets out an analysis of long-term debt and the movements in long-term debt:

The dilutive effect of stock options (as disclosed in note 6) and warrants has been included in the determination of the weighted average number of common shares outstanding. The performance stock options and performance share units have not been included in the determination of weighted average number of common shares outstanding as they are not yet vested.

For the three months ended September 30, 2024, the stock options and other equity-based awards are not included in the calculation of diluted earnings per share as they are anti-dilutive.

For the comparative period, the convertible 1.5 Lien Notes are dilutive at the level of profit from continuing operations and in accordance with IAS 33 *Earnings per Share*, have been treated as dilutive for the purpose of diluted EPS.

In 2023, the Company granted performance stock options to certain eligible employees. Subject to the performance vesting condition described below, the options will vest on April 1, 2026 and expire five years after the grant date. The performance vesting condition requires achieving a three-year cumulative Adjusted EBITDA target for 2023 to 2025 as set by the Board of Directors. If this target is not met, vesting of the options (or a portion thereof) will be at the discretion of the Board of Directors. At September 30, 2024, management has assumed that the cumulative three-year Adjusted EBITDA target will be met and will reassess this assumption at each reporting period.

Previously granted stock options are unaffected and vest equally over three years and expire five years from the date of grant.

The exercise price of outstanding options ranges from $3.41 to $10.00 with a weighted average remaining life of 2.91 years. When stock options are exercised, the proceeds together with the compensation expense previously recorded in contributed surplus, are added to capital stock.

Expected volatility is estimated by considering historical average share price volatility.

The Company grants deferred share units (DSUs) to its outside directors. Each DSU represents the right to receive a gross payment equal to the fair market value at the date of redemption, which date will be determined by the holder of the DSUs, subject to certain conditions. The fair market value is defined as the weighted average trading price of a common share of the Company on the Toronto Stock Exchange during the last five trading days prior to the date of redemption. The DSUs vest on or about the first anniversary of the date of grant and are settled in cash. The DSUs expire at a date determined by the Board of Directors, which shall not be later than three years following the end of the year in which the grant occurred. The fair value of the DSUs is recognized equally over the vesting period, based on the quoted market price of the Company's shares. At September 30, 2024, the liability pertaining to deferred share units was $1,262 (December 31, 2023 – $1,475).

Changes in the Company's obligations under the DSU grants, which arise from fluctuations in the market value of the Company's shares, are recorded as the share value changes.

In 2023, performance share units (PSUs) were granted to certain eligible employees. The PSUs vest on April 1, 2026, subject to both market and non-market conditions: (i) satisfaction of the same Adjusted EBITDA performance condition or Board of Directors discretion as the stock options; and (ii) a proration factor based on the fair market value of the common shares on April 1, 2026. The PSUs shall be settled in common shares issued from treasury within 30 days of the vesting date, and in any event prior to the expiry date of the PSUs of December 15, 2026.

At September 30, 2024, management has assumed that the cumulative three-year Adjusted EBITDA target will be met and no proration will be applicable. These assumptions will be reassessed at each reporting period.

7. LEASES

The Company's leasing activities comprise of buildings and various field equipment including railcars and motor vehicle leases. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any financial covenants other than the security interests in the leased assets that are held by the lessor.

The recognized right-of-use assets relate to the following types of assets:

8. FINANCIAL INSTRUMENTS

The Company's financial instruments included in the consolidated balance sheets are comprised of cash and cash equivalents, accounts receivable, deposits, accounts payable and accrued liabilities, and long-term debt.

(a) Fair Values of Financial Assets and Liabilities

The fair values of financial instruments included in the consolidated balance sheets, except long-term debt, approximate their carrying amounts due to the short-term maturity of those instruments. The fair value and carrying value of the Second Lien Notes, as measured based on the quoted market price at September 30, 2024 was $162,291 and $161,988, respectively (December 31, 2023 – $143,963 and $158,712).

The fair values of the remaining long-term debt approximate their carrying values, as described in note 4.

(b) Credit Risk

Substantial amounts of the Company's accounts receivable are with customers in the oil and natural gas industry and are subject to normal industry credit risks. The Company mitigates this risk through its credit policies and practices including the use of credit limits and approvals, and by monitoring the financial condition of its customers. At September 30, 2024, the Company had a loss allowance provision for accounts receivable of $1,805 (December 31, 2023 – $999).

IFRS 9 *Financial Instruments* requires an entity to estimate its expected credit loss for all trade accounts receivable even when they are not past due based on the expectation that certain receivables will be uncollectible. Based on the Company's assessment using the lifetime expected credit loss model, a loan loss allowance of $802 was recorded during the nine months ended September 30, 2024. The expected credit loss rates are based on actual credit loss experience over the past several years for each operating segment.

The loss allowance provision for trade accounts receivable as at September 30, 2024 reconciles to the opening loss allowance provision as follows:

	2024
(C$000s)	*($)*
At January 1, 2024	999
Increase in loan loss allowance recognized in statement of operations	802
Foreign exchange adjustments	4
At September 30, 2024	1,805

(c) Liquidity Risk

The Company's principal sources of liquidity are operating cash flows, existing or new credit facilities, new secured or unsecured debt, and new share equity. The Company monitors its liquidity to ensure it has sufficient funds to complete planned capital and other expenditures. The Company mitigates liquidity risk by maintaining adequate banking and credit facilities and monitoring its forecast and actual cash flows. The Company may also adjust its capital spending to maintain liquidity. See note 10 for further details on the Company's capital structure.

(d) Foreign Exchange Risk

The Company is exposed to foreign exchange risk associated with foreign operations where assets, liabilities, revenue and costs are denominated in currencies other than Canadian dollars. These currencies include the U.S. dollar and Argentinean peso. The Company is also exposed to the impact of foreign currency fluctuations in its Canadian operations on purchases of products and property, plant and equipment from vendors in the United States. In addition, the Company's Second Lien Notes and related interest expense are denominated in U.S. dollars.

The amount of this debt and related interest expressed in Canadian dollars varies with fluctuations in the US$/Cdn$ exchange rate. The risk is mitigated, however, by the Company's U.S. operations and related revenue streams.

The Company reviews its net U.S. dollar foreign exchange exposures on a quarterly basis across all operating segments, and as a result, the Company may enter into forward foreign exchange contracts to purchase U.S. dollars, subject to Board approval. These contracts do not qualify for hedge accounting and are accounted for as held for trading, with gains and losses recognized in profit or loss.

The following amounts were recognized in the statement of operations:

There were no derivative financial instruments recorded in the balance sheet as at September 30, 2024 as the foreign currency contracts were all settled prior to the end of the reporting period.

(e) Country Risk

The ongoing conflict between Russia and Ukraine has added a level of risk and uncertainty and additional restrictions around the operations of the Company's Russian subsidiary. As a result of these changes in circumstances, the risks, restrictions, and uncertainties surrounding banking and limitations on the ability to repatriate funds to Canada from Russia, the Company's ownership and control over its Russian subsidiary, the physical security of property, plant and equipment in Russia, collectability of accounts receivable, the regulatory approvals to complete a sale transaction and overall business and operational risks are being monitored and addressed as circumstances evolve. The impact of these risks are and will continue to be reflected in the financial statements as required.

The situation in Russia remains dynamic and additional sanctions or restrictions may be issued against or by Russia as the conflict evolves. Additional sanctions or restrictions could have a material impact on the Company's assets, business, financial condition and cash flows in Russia and the Company determined it will sell its Russian operations as noted in note 3.

9. SUPPLEMENTAL CASH FLOW INFORMATION

10. CAPITAL STRUCTURE

The Company's capital structure is comprised of shareholders' equity and debt. The Company's objectives in managing capital are (i) to maintain flexibility so as to preserve its access to capital markets and its ability to meet its financial obligations, and (ii) to finance growth, including potential acquisitions.

The Company manages its capital structure and makes adjustments in light of changing market conditions and new opportunities, while remaining cognizant of the cyclical nature of the oilfield services sector. To maintain or adjust its capital structure, the Company may revise its capital spending, issue new shares or new debt or repay existing debt.

The Company monitors its capital structure and financing requirements using, amongst other parameters, the ratio of net debt to Adjusted EBITDA. Adjusted EBITDA for this purpose is calculated on a 12-month trailing basis and is defined as follows:

For the Twelve Months Ended	**September 30, 2024**	December 31, 2023
(C$000s)	***($)***	*($)*
Net income from continuing operations	**28,161**	197,569

Income taxes	**6,544**	4,059
Adjusted EBITDA from continuing operations	**219,073**	325,456

Net debt for this purpose is calculated as follows:

	September 30, 2024	December 31, 2023
(C$000s)	***($)***	*($)*
Long-term debt, net of debt issuance costs and debt discount	**349,964**	250,777

Deduct: cash and cash equivalents	**(17,684)**	(34,140)
Net debt	**354,412**	241,065

The ratio of net debt to Adjusted EBITDA does not have a standardized meaning under IFRS and may not be comparable to similar measures used by other companies.

At September 30, 2024, the net debt to Adjusted EBITDA ratio was 1.62:1 (December 31, 2023 – 0.74:1) calculated on a 12-month trailing basis as follows:

For the Twelve Months Ended	**September 30, 2024**	December 31, 2023
(C$000s, except ratio)	***($)***	*($)*
Net debt	**354,412**	241,065
Adjusted EBITDA	**219,073**	325,456
Net debt to Adjusted EBITDA ratio	**1.62**	0.74

The Company is subject to certain financial covenants relating to leverage and the generation of cash flow in respect of its operating and revolving credit facilities. These covenants are monitored on a monthly basis. The Company was in compliance with its financial covenants associated with its credit facilities at September 30, 2024.

11. RELATED-PARTY TRANSACTIONS

Certain entities controlled by George S. Armoyan previously held US$16,771 of the Company's Second Lien Notes as at December 31, 2023. These holdings were sold during 2024.

The Company leases certain premises from a company controlled by Ronald P. Mathison. The rent charged for these premises during the nine months ended September 30, 2024 was $718 (nine months ended September 30, 2023 – $718), as measured at the exchange amount, which is based on market rates at the time the lease arrangements were made and is under the normal course of business.

12. REVENUE FROM CONTRACTS WITH CUSTOMERS

The Company derives revenue from the provision of goods and services for the following major service lines and geographical regions:

The Company recognizes all its revenue from contracts with customers and no other sources (such as lease rental income).

The Company does not incur material costs to obtain contracts with customers and consequently, does not recognize any contract assets. The Company does not have any contract liabilities associated with its customer contracts.

13. PRESENTATION OF EXPENSES

The Company presents its expenses on the consolidated statements of operations using the function of expense method whereby expenses are classified according to their function within the Company. This method was selected as it is more closely aligned with the Company's business structure. The Company's functions under IFRS are as follows:

- operations (cost of sales); and
- selling, general and administrative.

Cost of sales includes direct operating costs (including product costs, direct labour and overhead costs) and depreciation on assets relating to operations.

15. SEGMENTED INFORMATION

The Company's activities in its continuing operations are conducted in two geographical segments: North America and Argentina. All activities are related to hydraulic fracturing, coiled tubing, cementing and other well completion services for the oil and natural gas industry.

The business segments presented reflect the Company's management structure and the way its management reviews business performance. The Company evaluates the performance of its operating segments primarily based on Adjusted EBITDA, as defined below.

Adjusted EBITDA is defined in the Company's credit facilities for covenant purposes as net income or loss for the period adjusted for interest, income taxes, depreciation and amortization, foreign exchange losses (gains), non-cash stock-based compensation, and gains and losses that are extraordinary or non-recurring. Adjusted EBITDA is presented because it is used in the calculation of the Company's bank covenants. Adjusted EBITDA for the period was calculated as follows:

16. SEASONALITY OF OPERATIONS

The Company's North American business is seasonal. Historically, the lowest activity is typically experienced during the second quarter of the year when road weight restrictions are in place due to "spring break-up" weather conditions and access to well sites may be reduced in Canada and the broader Rockies region in the United States where the Company operates. Activity in the fourth quarter is typically impacted by customer budget exhaustion and seasonal holidays in North America. Over the last few years, a trend has been developing in North Dakota and the broader Rockies region in the United States for customers to delay the ramp-up of their completion programs in the early part of the year due to increased costs and challenges operating in extreme cold weather that can prevail in the region in January and February. This trend, coupled with wellsite access enhancements, longer pad completions and the focus of core customers in Canada, has caused a shifting of activity levels for the Company from Q1 into Q2, and appears to be normalizing the impacts of spring-up break-up that had previously been significant.
